AREAS OF ACTIVITY

Gardner Denver Schopfheim is a manufacturer of systems and equipment for air compression, gas compression and vacuum generation. Focussing on customer needs has our highest priority.

COMPANY DATA

CONTACTS

Wolfgang Schulze-Kadelbach
Sales Manager

PLANNED EXHIBITIONS

Glasstec 2010
Düsseldorf, Germany
28 September / 1 October 2010

The single-stage compressor types Wittig RO and Wittig RO topline with oil injection cooling supply a constant air flow of high quality virtually without pulsation. In addition to low operating cost, reliability and long life are major features of these types. Due to their long operational life, they have very low life cycle costs.

Vacuum pumps type Wittig WPSO are water cooled machines. In combination with a positive displacement pump, the Wittig WPSO vacuum pumps can be used as pump stations.

RANGE OF PRODUCTS

- ROTARY VANE COMPRESSORS FOR AIR AND GASES
- VACUUM PUMPS • PUMP STATIONS
