TURNOVER FROM GLASS

100%

SALES

Domestic: 15% - **International:** 85%

OFFICE AREA

1,800 sq.m.

PLANT AREA

6,700 sq.m.

NUMBER OF EMPLOYEES

60

COMPANY FOUNDED

1988

REVIMAC belongs to the BOTTERO group of companies.

The company boasts more than 25 years experience with global major glass containers manufacturers by supplying a wide range of machinery and equipment in the hot-end area.

Since the year 2000, REVIMAC has supplied more than 90 **forehearths**.

Numerous improvements have been introduced in terms of design of the refractory superstructure, air-gas mixing unit and control system to optimize glass conditioning.

REVIMAC is a leading supplier of "**Re-manufactured**" **IS machines and section boxes**, covering the full range of centre distances, in single-, double- and triple-gob operation in Blow & Blow, Press & Blow and NNPB processes.

In the last 10 years our 6,700 sq.m. assembly shop has been involved in the re-manufacturing of almost 90 IS machines and more than 600 section boxes.

The new type of control of 3- and 5-axes completes the REVIMAC range of **servo-stackers** suitable to run high-speed production lines and to handle unstable glassware.

The control of the RSS-950 5-axes servo stacker features a user-friendly touch screen interface and a self-learning function to minimise operator intervention.

Servo motor technology is also applied to the newly designed REVIMAC **arcuate shear mechanism**, which enables to retrofit any type of conventional mechanical feeder mechanisms with servo control.

REVIMAC ware handling solutions include **ware transfers** (up to 700 bpm) and **water cooled cross conveyors** with stand alone control or integrated within the IS machine drive system.

Entirely stainless steel fabricated **Hot treatment hood** featuring anticorrosion components and easy maintenance access for the operators complete the range of equipment in the hot area.

Last but not least, REVIMAC **Top and Bottom spray cold treatment** units with 2- and 3-axes control add the "final touch" to glass containers.

WORKING END & FOREHEARTH AIR GAS MIXING UNIT WITH ON BOARD MAIN CABINET

5 AXES SERVO STACKER RSS950

RANGE OF PRODUCTS

- FOREHEARths AND WORKING ENDS • RE-MANUFACTURED IS MACHINES AND SECTION BOXES • WARE HANDLING EQUIPMENT • HOT-END ANCILLARY EQUIPMENT
